SCALDASALVIETTE ELETTRICO / ELECTRIC TOWEL WARMER

Scaldasalviette modulare alimentato ad energia elettrica a basso voltaggio (24 Volt).

Componibile con due lunghezze differenti di barra (L. 58 cm e 106 cm) a seconda delle esigenze di progetto, con il suo design pulito e lineare EQUILIBRIO si adatta facilmente ad ogni ambiente domestico ed è installabile sia in orizzontale che in verticale.

L'incasso universale ne determina la massima componibilità e/o ripetibilità.

Disponibile con o senza interruttore, ogni composizione di EQUILIBRIO è abbinata ad un alimentatore dedicato.

Scatola di derivazione e cavi elettrici sono a discrezione dei tecnici addetti all'installazione.

EQUILIBRIO è compatibile con i sistemi di domotica.

Per motivi di sicurezza EQUILIBRIO deve essere installato ad una distanza minima da terra di 600 mm rispetto all'elemento inferiore.

/

Modular heated towel rail powered by low-voltage electricity (24 Volt).

Thanks to its modular design, available in different lengths of towel rail (L. 58 cm and 106 cm) according to the project requirements, EQUILIBRIO's clean lines are a perfect fit for any domestic setting.

The universal and unconnected built-in part permits a total match between the elements.

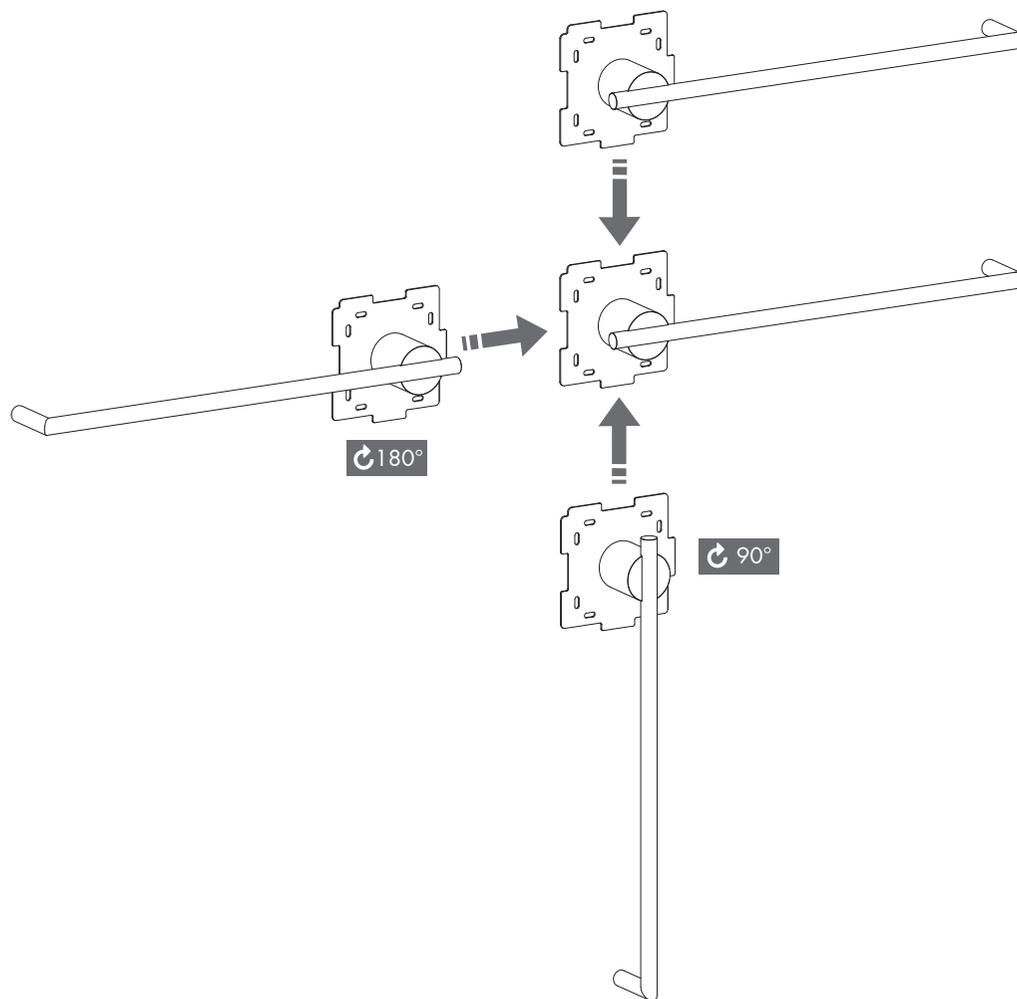

The item can be installed both horizontally and vertically.

EQUILIBRIO works with home automation systems.

It is available with or without power button and each combination has a dedicated power supply that must be housed in a junction box.

The junction box and the electrical cables are not included.

For safety reasons, this appliance should be installed at least 600 mm above the floor.

ESEMPI D'INSTALLAZIONE

/ EXAMPLES OF INSTALLATION

Il corpo ad incasso universale ne determina la massima componibilità e/o ripetibilità, per cui ogni elemento è installabile in orizzontale o in verticale. Qualora il montaggio del corpo incasso avvenga in linea, la distanza minima fra i due elementi sarà di 150mm.

Disponibile con o senza pulsante, ogni composizione è abbinata ad un alimentatore dedicato che supporta fino a 80 Watt ed è collegato ad un unico interruttore.

Qualora si desideri aggiungere altri elementi alla composizione, è necessario calcolare che la somma dei consumi degli elementi non superi gli 80 Watt. Se la nuova composizione supera gli 80W è necessario aggiungere un nuovo alimentatore (TRS01) e un interruttore (BOT03 o pulsante normalmente aperto).

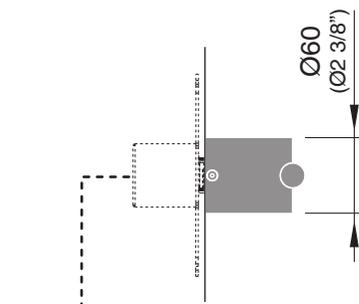

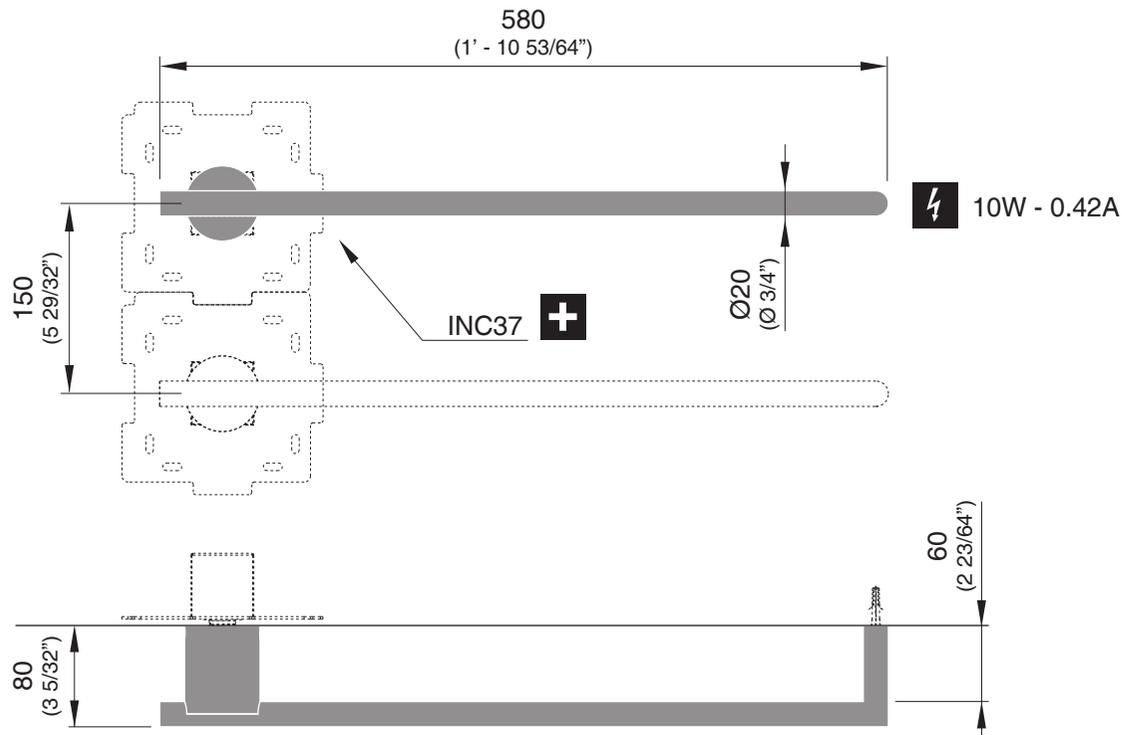

/

The universal built-in part determines its maximum modularity and/or repeatability, so that each item can be installed either horizontally or vertically.

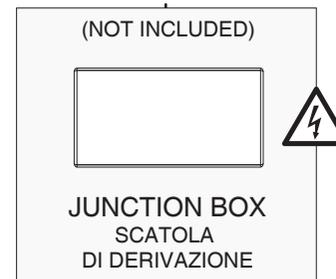

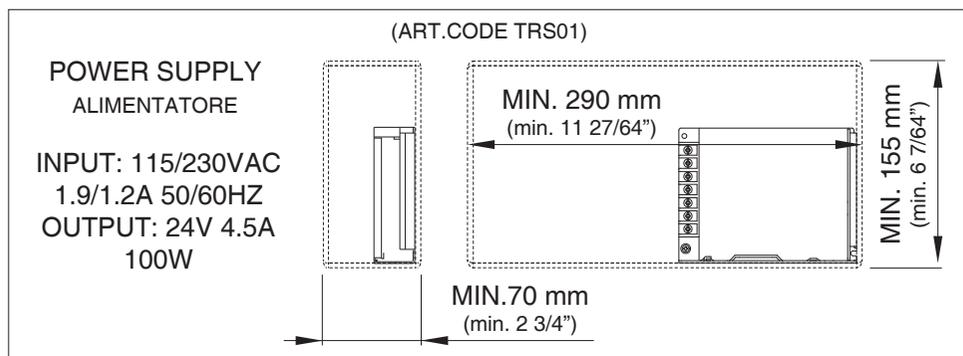

If the built-in parts are installed in-line, the minimum distance between the two elements will be 150mm.

It is available with or without button and each composition is combined with a dedicated power supply unit that supports up to 80W and is connected to a single switch.

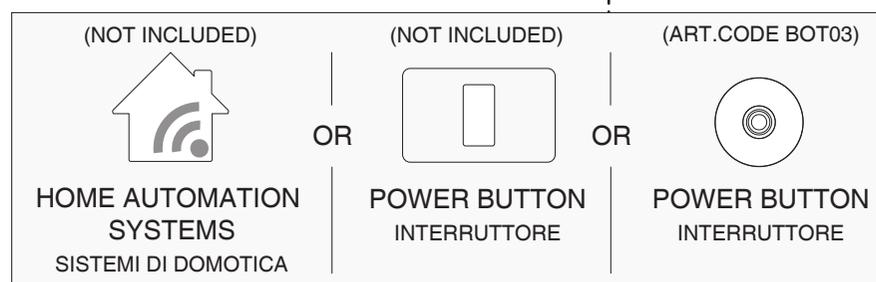

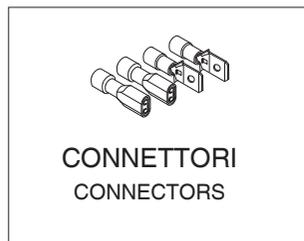

If other elements are to be added to the composition, it is necessary that the final sum of the elements' consumption does not exceed 80W. If the new composition exceeds 80W, it is necessary to add a new power supply unit (TRS01) and a switch (BOT03 or retractive switch).
